The Club has contributed over HK$12 million to service projects since its inception. A major project it contributed to in 2002 was a support program of the Spastics Association of Hong Kong for young mothers of children with spastics problem. The Club supports one Golden Z Club and six Z Clubs. The Golden Z Club of the Hong Kong Baptist University has risen to over 300 students. It organized a Teen-Kids Service Program to develop a mentor-mentee relationship with Primary 1-6 students; held an Adventure Camp; raised funds for the Medicins Sans Frontieres, and participated in the Zonta Health Van Project to educate the public on prevention and early detection of breast cancer.

Membership in the six Z Clubs grew by 279 new members in 2002-03, and now totals 641 members. The six Clubs jointly organized a Fun Day for over 200 new immigrant (from the Mainland) children aged 2 to 12, and their parents. A 3-day Leadership Workshop for 30 potential Z Club officers was held to help them become more pro-active leaders in their Clubs.

On advocacy, the Club has invited legislators, senior government officials and prominent community leaders to speak at general meetings on issues of general concern to Hong Kong. Workshops to give briefing and role-playing on the legislative process were organized for members of the Z Clubs and Golden Z Club.
